Graduate Texts in Mathematics (GTM) (ISSN 0072-5285) is a series of graduate-level textbooks in mathematics published by Springer-Verlag. The books in this series, like the other Springer-Verlag mathematics series, are yellow books of a standard size (with variable numbers of pages). There are two linear algebra books by Strang, both in 4th editions: "Introduction to LA," and "LA And Its Applications." Can anyone tell me which is more advanced? I know, duh, one is an introduction, and one has applications. But I looked through them at a bookstore, and they seem to cover the same ...

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...

..If you had to teach yourself math from basic algebra to high level mathematics, what would be your strategy?
