

Download Earth Science Energy Resources Study Guide

For example, the food you eat contains chemical energy, and your body stores this energy until you use it when you work or play. Energy Sources Can be Categorized As Renewable or Nonrenewable Paul W. Stackhouse Jr., D. J. Westberg, J. M. Hoell, A. J. Barnett, T. Bristow, and D. Crawley. Enabling the Increase of Energy Efficiency in Buildings by Provision of Long-Term Surface Meteorological and Solar Energy Parameters Using NASA Data Products Via GIS-Enabled Web Services. Explore our free HiSET Science study guide and get ready for the HiSET Science test using our exam review tips. Start preparing today! Earth is the third planet from the Sun and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth revolves around the Sun in 365.26 days, a period known as an Earth year.
